Summary

As a recent graduate from the University of Greenwich, I specialize in React and its libraries and frameworks such as MobX and Vite.js respectively, along with TypeScript for solid frontend development. I'm adept at using Tailwind CSS and SASS for polished designs and can seamlessly implement design concepts into code using Figma. I'm always keen to learn and adapt to new technologies to broaden my skill set and contribute effectively to any team.

Work Experience

3KManga - A reading comic website (Apprenticeship)

March 2023 - November 2023

- Developed front-end user interfaces for several complex web applications with HTML, CSS, and JavaScript.
- Made use of third-party libraries such as PostgreSQL.
- Utilized React frameworks to create interactive, responsive, and user-friendly web designs.
- Collaborated with back-end developers to ensure web applications met comic reading requirements.
